

Media Messages and AI

Instructions: As you read the article “Nonbiological Man: He’s Closer Than You Think,” pause at each point listed below and respond to the question. Write two or three sentences for each prompt.

1. Accelerating Technological Change

How does the article describe the speed of technological change? How might this influence the way information and media are created and shared?

2. Brain-Cloud Connections

What does the article say about connecting the human brain to technology? How could ideas like this change the way we interact with information and media?

3. Backing Up the Mind

What new possibilities or challenges does the article suggest about backing up the human mind? How might ideas like this affect how we view information or memory or how much we trust media?

Final Reflection

Use the space below to respond thoughtfully.

How did the article expand or change the way you think about AI and media?

What is one strategy you can use to stay thoughtful and aware when interacting with AI-created media?
