Content Curation Concept Map

Instructions: Create a concept map for content curation. You can organize your ideas in a visual web or fill out the sections below. If you make a visual web, write "CONTENT CURATION" in the center of your paper. Around it, identify six key forces or influences that shape what content you see online—such as algorithms, sponsored content, or personal search history. For each force, include a specific example and explain how it connects to content curation.

Finally, reflect on your concept map by responding to the prompt at the bottom of the page.

Center Concept: CONTENT CURATION

**Force #1:** _____

Example: _____

How it connects:

_____

_____
