Instructions: Read each skill aloud. Students should stand if they heard it mentioned in their peer interviews. This activity helps students to recognize common abilities across different industries and how they connect.

Career Skills List

1. **Problem-solving:** finding solutions to challenges in the workplace

2. **Creativity:** thinking outside the box and generating new ideas

3. **Teamwork:** collaborating effectively with others

4. **Adaptability:** adjusting to new situations and technologies

5. **Communication:** clearly expressing ideas and listening actively

6. **Leadership:** guiding and motivating others

7. **Technical skills:** using industry-specific tools, software, or equipment

8. **Time management:** organizing tasks efficiently to meet deadlines

Discussion Questions

- Which abilities appeared most often in different careers?

- Were there any that surprised you?

- Which do you think will be most important in the future?

Use this discussion to help students connect these abilities to career success.
