

Research Guide: Conservation Plan

Instructions: Read the assigned section of the Conservation article, conduct additional research, and propose a conservation plan.

Circle your assigned resource:

- water conservation / soil conservation / wildlife conservation
- forest conservation / mineral and fossil fuel conservation

1. What is your assigned resource used for? Why is it important to conserve it?

2. What are the main environmental challenges affecting the conservation of your assigned resource?

3. What are some individual, local, national, and international actions we can take to protect it?

Individual: _____

Local: _____

National: _____

International: _____

Name: _____

Date: _____

4. How can we measure whether these actions are working?
